Alexandria, VA 22313-1450

**Declaration of Brianna L. Hinojosa-Flores**

Dear Sir:

I, Brianna Hinojosa-Flores, hereby declare the following:

1. I have been employed as Patent Counsel (formerly Intellectual Property Coordinator) at Uniden America Corporation (hereinafter referred to as "Uniden") since April 23, 2001.
2. As part of my responsibilities at Uniden, I oversee the patent acquisition process including the submission of invention disclosure forms, the patent application approval process and the patent

application preparation and filing process as well as various other patent related duties.

3. Between April 29, 2001 and May 14, 2001, I met with Arthur Y. Tsubaki, Director of Product Planning at Uniden, regarding the GPS scanner concept which he had developed and acquisition of patent protection for the GPS scanner concept.
4. On or about May 14, 2001, I performed a patent search relating to the GPS scanner concept and recommended that a formal disclosure relating to the GPS scanner concept be submitted on a Uniden Invention Disclosure Form.
5. On June 1, 2001, I received the Uniden Invention Disclosure Form relating to the GPS scanner concept from Mr. Tsubaki and co-inventors Kenneth Carpenter and James Cassidy.
6. Between June 1, 2001 and June 19, 2001, I processed the Uniden Disclosure Form including cataloging the Uniden Invention Disclosure Form, obtaining a Uniden invention disclosure number of U-0106-1, reviewing the patents identified in my patent search and the contents of the Uniden Invention Disclosure Form, obtaining approval to proceed with a patent

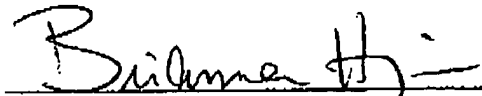

application from Uniden Management, contacting outside counsel to determine availability for drafting a patent application and preparing a letter to outside counsel regarding the preparation of a patent application covering the GPS scanner concept.

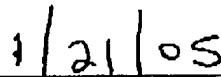

7. On June 19, 2001, I met with Lawrence R. Youst, outside patent counsel from Danamraj & Youst, P.C., regarding the GPS scanner concept and participated in a portion of an oral disclosure meeting between Mr. Youst and Mr. Tsubaki.
8. On or about July 16, 2001, I received a draft of the patent application relating to the GPS scanner concept prepared by Mr. Youst.
9. Between July 16, 2001 and August 7, 2001, I reviewed the patent application, consulted with the inventors regarding their review of and comments relating to the patent application, provided the inventor comments to Mr. Youst, coordinated the execution of the Declaration and Power of Attorney by the inventors and provided the executed Declaration and Power of Attorney to Mr. Youst.
10. The patent application relating to the GPS scanner concept was filed on August 8, 2001.

11. As part of the preparation of this Declaration, I have reviewed the relevant pages of Mr. Tsubaki's inventor's notebook, Mr. Tsubaki's declaration and Mr. Youst's declaration.
12. Based upon my experience as a patent attorney having drafted and filed over sixty (60) patent applications, I believe that the contents of Mr. Tsubaki inventor's notebook and declaration establish conception at least as early as February 1, 2001. Also, I believe that Mr. Tsubaki diligently worked toward a reduction to practice to the GPS scanner concept and that Mr. Tsubaki, Mr. Youst and myself diligently worked toward the preparation and filing the above-captioned patent application following Mr. Tsubaki's conception of the invention.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may

jeopardize the validity of the application or any patent issued thereon.

  
Brianna L. Hinojosa-Flores
